Ver.202608

VRT'POD is your ultimate refuge from distractions and noise pollution in the workspace.

Features

Efficient

VRT'POD is the third space in the workplace. Different from offices and meeting rooms, it is a nimble space that can be located anywhere within the office environment. It provides workers with an efficient communication space that is readily available, eliminating the need to wait for the reservation of a meeting room.

Peace

VRT'POD is designed to enhance the team's concentration and ignite your creativity, endowing you with the power to boost productivity and rejuvenate your spirit. It is the sanctuary you've been searching for, ready to transform your working experience.

Sprightly

VRT'POD is a freely movable device that can be placed according to the needs of the environment. Thanks to its DIY eased of reassembly, relocation across cities is an easy task.

Wisdom

VRT'POD is equipped with an AI data matrix. It is not just an Internet of Things (IoT) system. Based on AI, it can achieve the conversion of a large amount of data, providing managers with visual references and gathering the data assets favored by corporate administrations.

Material

Based on the mission of being friendly to the earth's environment, the VRT'POD selects carbon-plastic materials that can be recycled and reused i.e. PE/PVC plastics such as discarded water bottles we throw away. Low carbon footprint, environment friendly, water resistance, and high load-bearing capacity is our advantages.

Configure

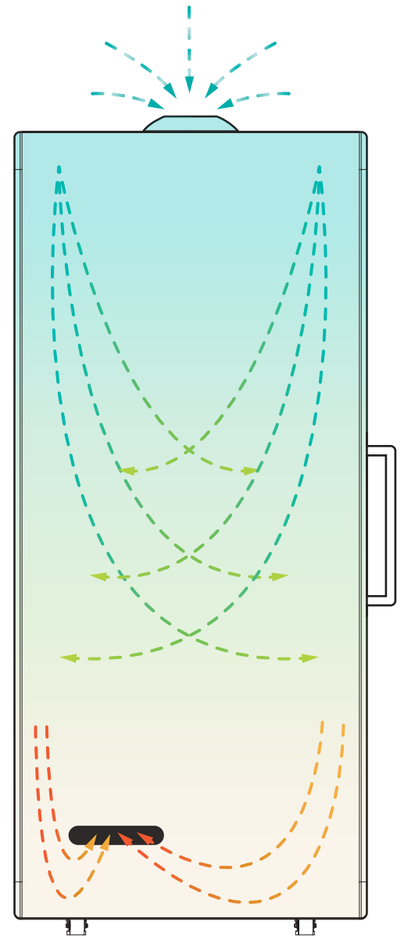

VRT'POD understands the demands of the working environment and offers five different application options, fulfilling various purposes such as phone booths, video conferences, independent office spaces, meeting and negotiation areas. From the ergonomics of the space to the desks and chairs, and from the lighting to the air circulation, it adheres to the physiological and psychological needs and satisfaction to the workers.

- **EMinimalist rounded corner design, breaking the "God's perspective"**
- **With the ultimate Japanese-style space, it is compact but not cramped.**
- **It gives you a sense of the spring breeze caressing your body and features a fresh air design**
- **with air inlet at the top and outlet at the bottom.**
- **Ergonomic desks and chairs cater to different usage methods.**
  DIY modular components make it easy to assemble during relocation and movement.

Ventilation system

Panasonic has been proved to have a reliable fresh air technology. In collaboration with us, our engineer able to incorporate a new fresh air circulation system with low noise and high pressure. It is equipped with a centrifugal fan with low rotation speed and high wind pressure, as well as a hidden labyrinth noise reduction air duct. It offers completely different user experience from our high-speed "turbofan blowers", and this is one of the innovative aspects of the VRT'POD.

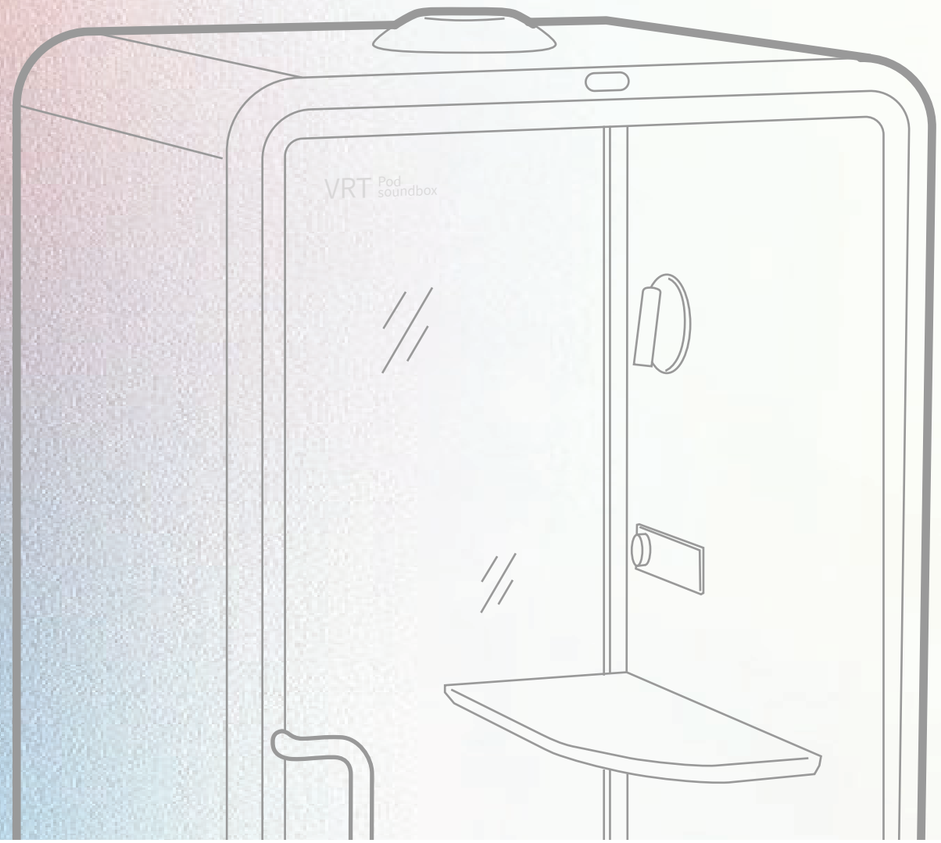

Ventilation

VRT'POD combines advanced technology and thoughtful design to create an excellent user experience. The Panasonic centrifugal fresh air system for the cabin provides an air flow of up to 95 cubic meters per hour (m^3/hr) or 56 cubic feet per minute (CFM) at a low rotation speed of 1200 revolutions per minute (RPM). This is a fresh air index that is difficult for traditional turbofan blowers to achieve even at a rotation speed as high as 5000 RPM. It should be noted that the rotation speed of the fan in tandem to the fan noise. For a silent cabin, noise is undoubtedly a powerful destroyer.

- Centrifugal fan with low noise and high pressure.
- Servo variable speed motor.
- Level 1 low-carbon energy consumption.
- Labyrinth noise reduction air duct.
- Low-resistance air guide cover.
- Pressure relief exhaust vent.

VRT

VRT S

For One

When you need a single-person space specifically designed for quick calls, the VRT S is your ideal solution. With its excellent sound insulation effect and stylish appearance, it creates a distraction-free area where you can communicate easily and effectively.

AI Digital Matrix

VRT'POD is equipped with an AI data matrix. It is not just an Internet of Things (IoT) system. Based on AI, it can achieve the conversion of a large amount of data, providing managers with visual references and gathering the data assets favored by corporate administrations.

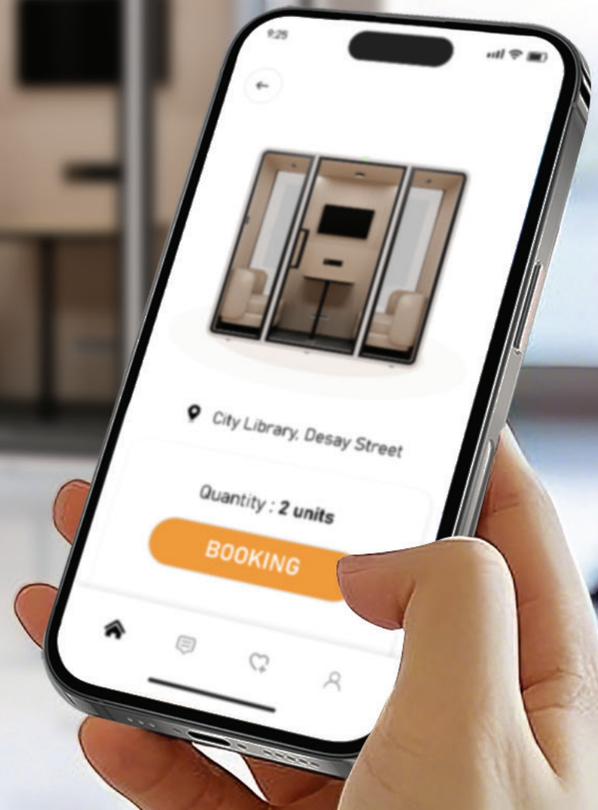

- Multiple Access: Supports Web, APP, Mini Program, NFC, QR code, and IC.
- Communication Connection: Built-in compatible Wi-Fi, 4G, and Bluetooth.
- Power Management: Global positioning through the cloud, remote power on/off management.
- User Management: Administrative authorization, fixed-point reservation, and payment system.
- Environmental Monitoring: Real-time detection of temperature, humidity, and air quality.
- Usage Monitoring: Occupancy sensing and usage records.
- Status Monitoring: Fault early warning monitoring, automatically sending fault code alarms to administrators.
- Screen Transfer Control: Transfer the screen to the mobile phone interface for control via NFC.
- Memory Settings: Members can activate personalized settings when entering the cabin, and the settings will be restored to the factory defaults when leaving the cabin.
- Fast Charging: USB-C (PD 20W) & USB-A (QC 3.0).
- Power Compliance: DIY embedded safety power socket.

Vrt Pod's NFC inductive control and reservation system offer a modern and convenient smart experience.

Touchless induction switch, saying goodbye to traditional buttons.
Redefine "touch" with technology! It brings hygiene, convenience and a sense of the future all at once.

Experience a workspace that combines intelligence and comfort. This is where innovation and efficiency complement each other perfectly.

Smart Booking and Management

Achieve full control without any blind spots. It is your intelligent operation and maintenance brain, enabling every piece of equipment to "speak".

Unbounded communication breaks through the signal barrier and enables precise positioning.
Check it out anytime, anywhere. It's right by your side.

Intelligent Fault Feedback

There is a malfunction with the main light and the ambient light.

City Library, Desay Street

Make the "heartbeat" of the equipment clearly visible at a glance, bid farewell to guesswork, misjudgments, and make efficiency and peace of mind within easy reach.

The busy-idle indicator light. A touch of light and shadow tells the "working language" of the product, serving as a bridge for a tacit dialogue between people and the equipment.

AC

Here, nestled within the tranquil expanse of the Milky Way, lies your personal sanctuary, an absolute domain all your own. The temperature within is at your fingertips, ensuring a constant and comfortable climate, regardless of the external heat or chill. The gentle rustling of activities almost fades into the background, allowing you to immerse yourself in creative pursuits, rest, or let your imagination run wild.
